TRAVEL AND TOURISM SPENDING GREW IN SECOND QUARTER 2011

Real spending on travel and tourism increased at an annual rate of 2.6 percent in the second quarter of 2011 after increasing 2.8 percent (revised) in the first quarter. Growth in travel and tourism outpaced growth in real gross domestic product (GDP), which increased 1.0 percent in the second quarter after increasing 0.4 percent in the first quarter. The growth in real spending on tourism primarily reflected increases in total transportation and in recreation and entertainment.

Overall growth in prices for travel and tourism goods and services remained high, increasing 7.3 percent in the second quarter of 2011 following an 8.5 percent (revised) increase in the first quarter. The growth in prices for travel and tourism goods and services reflected increases in prices for traveler accommodations and for gasoline.

Billions of chained
(2005) dollars

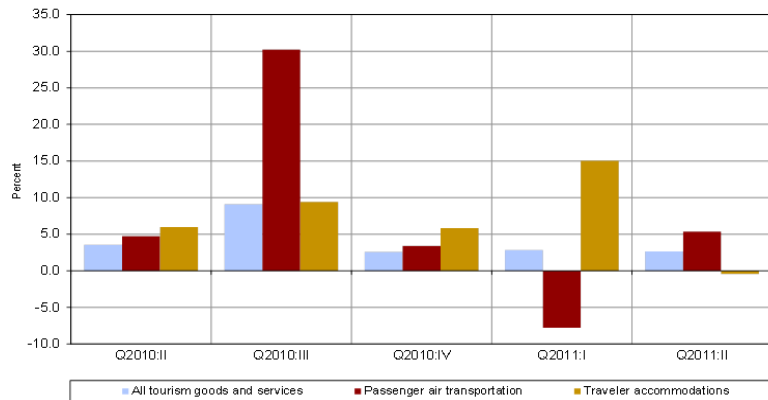

Chart 1. Real Tourism Spending

Direct tourism-related employment increased 2.6 percent in the second quarter of 2011 after increasing 2.0 percent (revised) in the first quarter. By comparison, overall U.S. employment increased 1.4 percent in the second quarter after increasing 1.3 percent in the first quarter.

Real Tourism Spending. Real spending on passenger air transportation increased 5.4 percent in the second quarter of 2011 after decreasing 7.8 percent in the first quarter. Capacity utilization increased, even as prices rose to cover rising fuel costs. Real spending on traveler accommodations decreased 0.4 percent in the second quarter after increasing 15.0 percent in the first quarter.

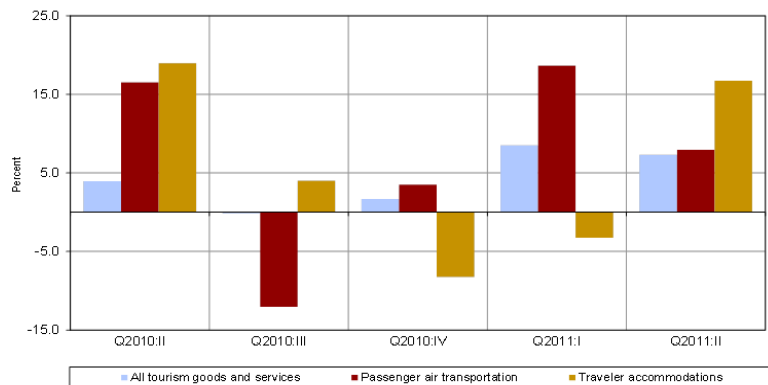

Chart 2. Quarterly Growth in Real Tourism Spending

U.S. Bureau of Economic Analysis

Tourism Prices. Prices for traveler accommodations increased 16.7 percent in the second quarter of 2011 after decreasing 3.3 percent in the first quarter. Prices for passenger air transportation continued to grow, increasing 7.9 percent in the second quarter after increasing 18.7 percent in the first quarter. Air passengers paid more in the second quarter as fuel costs continued to rise.

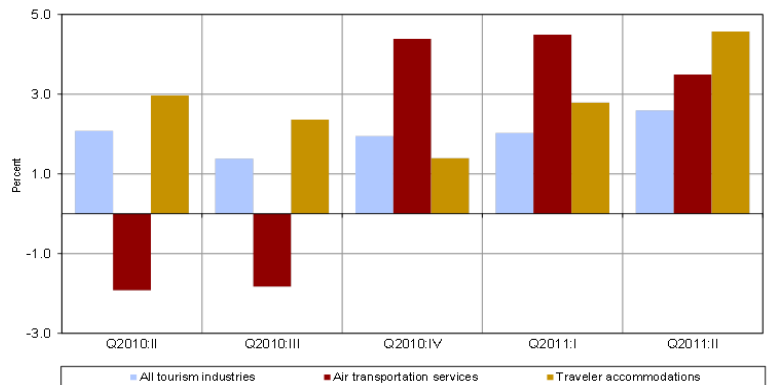

Chart 3. Quarterly Growth in Tourism Prices

U.S. Bureau of Economic Analysis

Tourism Employment. Direct employment in the travel and tourism industries increased 2.6 percent in the second quarter of 2011. All industries saw increases in employment with traveler accommodations experiencing the largest growth at 4.6 percent.

Chart 4. Quarterly Growth in Tourism Employment

U.S. Bureau of Economic Analysis

Total Tourism-Related Spending in the U.S. includes the goods and services that are purchased directly by visitors and the inputs used to produce these goods and services. In the second quarter of 2011, total current-dollar tourism-related spending was \$1.2 trillion and consisted of \$803.9 billion (68 percent) of direct tourism spending — goods and services sold directly to visitors — and \$383.3 billion (32 percent) of indirect tourism-related spending — goods and services used to produce what visitors buy.

Total Tourism-Related Employment was 7.7 million in the second quarter of 2011 and consisted of 5.4 million (71 percent) direct tourism jobs — jobs where workers produce goods and services sold directly to visitors — and 2.3 million (29 percent) indirect tourism-related jobs — jobs where workers produce goods and services used to produce what visitors buy.

Definitions

Tourism spending. Tourism spending comprises all goods and services purchased by tourists (defined as people who travel for any reason). In the following tables, tourism spending is referred to as direct tourism output.

Indirect tourism-related spending. Indirect tourism-related spending comprises all output used as inputs in the process of producing direct tourism output (e.g., toiletries for hotel guests and the plastic used to produce souvenir key chains).

Total tourism-related spending. Total tourism-related spending is the sum of direct tourism spending and indirect tourism-related spending.

Direct tourism employment. Direct tourism employment comprises all jobs where the workers are engaged in the production of direct tourism output (such as hotel staff, airline pilots, and souvenir sellers).

Indirect tourism-related employment. Indirect tourism-related employment comprises all jobs where the workers are engaged in the production of indirect tourism-related output (e.g., employees of companies that produce toiletries for hotel guests and the plastic used to produce souvenir key chains).

Total tourism-related employment. Total tourism-related employment is the sum of direct tourism employment and indirect tourism-related employment.

These statistics are from BEA's Travel and Tourism Satellite Accounts (TTsAs), which are supported by funding from the Office of Travel and Tourism Industries, International Trade Administration, U.S. Department of Commerce. The current-price statistics of direct tourism output were derived from BEA's annual TTsAs and from current-price quarterly statistics of personal consumption expenditures from the National Income and Product Accounts (NIPAs). The real statistics of direct tourism output were developed using price indexes from the Bureau of Labor Statistics (BLS) and real quarterly statistics of personal consumption expenditures from the NIPAs. The statistics of direct tourism employment were derived from the annual TTsAs (revised in June 2011) from BEA, the Quarterly Census of Employment and Wages (QCEW), and Current Employment Statistics (CES) from BLS.

Quarterly statistics are seasonally adjusted and expressed at annual rates, unless otherwise specified. Percent changes are calculated from unrounded data and annualized. Real values are in chained (2005) dollars. Price indexes are Fisher chain-type measures. Growth in overall U.S. employment is calculated using BLS total nonfarm employment from Current Employment Statistics, www.bls.gov/ces/home.htm#data.
