(1) 2015 arrivals and percent change reflect a combination of additional records counted and market conditions.

(2) Excludes Canada and Mexico

(3) Percentage-point and percentage changes are based on non-rounded data.

(4) Only census region, state, and city destinations having a sample size of 400 or more are displayed. Due to quarterly data weighting by country and port of entry, some unreported destinations may have a higher proportion of total than those reported.

(**) Estimate not shown due to sample size fewer than 400 for this year.

(r) Estimate was revised.

(p) Estimate is preliminary and subject to revision.

Survey of International Air Travelers

The Survey of International Air Travelers provides a level of detail and insight into the traveler characteristics and travel patterns of international visitors to and from the United States not found elsewhere. Responses are weighted with data from the Department of Homeland Security and the following thirty-seven tables are then populated. This report, which was constructed using just a fraction of the data available, summarizes what we know about the overseas leisure traveler who visits the United States.

Interested in obtaining data for your organization?

One of the unique features of the Survey program is its 'data-mining' potential. The Survey research data, collected from the questionnaire, is maintained in a computer database. Therefore, customized reports, special tables and data files are available.
